Education

Griffith University

Bachelor of Multimedia. Interactive entertainment major

Completed 2007

Yeronga Tafe

Diploma of Multimedia

Completed 2003

Technical Skills

Drupal

I have been working with Drupal as my primary site building tools since 2008.

9 Years

PHP

I have used PHP on a regular basis since 2006.

11 Years

Javascript

Using javascript is usually an integral part in a website, and as such, I have been using it for many years. Recently though, I have been delving a little deeper into Javascript for use with frameworks such as Three.js.

14 Years

Jquery

I started using Jquery when I started using Drupal, as Jquery is used extensively in Drupal.

9 Years

HTML - HTML5

As with many developers, my first foray into computer languages was with HTML when doing a Diploma of Multimedia in 2003

14 Years

Actionscript 3

10 Years

I was introduced to Actionsript while at university, Actionsript 3 was easier to understand with it's object orientated nature (as I had previously studied JAVA) and really helped me to understand object orientated programming.

3D Studio Max

15 Years

I first started with 3ds Max while doing a Diploma of Multimedia at Tafe. I really got stuck into it when I bought a magazine with a tutorial on how to make UT2003 characters. I have been playing with it for years with some of my work being shown on large screens at the Indy on the Gold Coast. 3D was what inspired me to further my studies and go to University.

Work Experience

Javascript Developer

Entegy, Contract

MAR 2017 - JUN 2017
